## DASSAULT | FALCON 7X

MAXIMUM PASSENGERS

14

MAXIMUM RANGE

11'020 KM

### BENCHMARK BUSINESS JET

From its inception, the Falcon 7X was destined to be a revolutionary aircraft, introducing business aviation to the industry's first Digital Flight Control System. Like so many other aspects of the aircraft, its DFCS drew on Dassault's 30 years of military experience, especially its Rafale and Mirage 2000 programs.

The 7X would become the first business jet to use fighter jet technology with an elegant, whisper-quiet executive cabin.

### PURE ELEGANCE

Today, over 200 Falcon 7X aircraft are in service in 32 countries. The fleet has performed some 250,000 flight hours and presents excellent dispatch reliability.

And a growing number of operators worldwide are discovering they need not compromise small-jet agility and efficiency for long-range comfort and capability. Now a mature and proven aircraft platform, the Falcon 7X is still the most advanced — still the business jet benchmark for the 21st century.
